

PUBLIC SAFETY

Rigid Industries police, fire, first responder, military, and EMS LED lights have an advantage over strobe and rotating light bars by being extremely durable and having extended lifespans. Traditional light bars often have lights with filaments in them. These filaments can burn out or shake loose over time. LED light bars do not have these problems. The lifespan is three times greater than traditional lights. Additionally, our lights have 100% On/Off performance with no warm-up time.

E-SERIES SR-SERIES

E-Series High Intensity LED Lights are the perfect solution for your safety needs. Our reliable and powerful light bars are ideal for any police, fire, or military use.

Q-SERIES

Designed specifically to function in any environment and withstand any abuse. Available in a 7,000 lumen Hybrid model or 9,000 lumen Specter model with diffused lens options. This light is big, bright, and heavy duty.

D-SERIES

The Dually and D2 lights are the brightest auxiliary light available to date. While small and compact, these 3"x3" LED lights still produce up to 3096 lumens.

A-SERIES

Rigid's A-Series™ LED accessory light is small, yet versatile and effective. Though compact, the A-Series™ emits up to 400 lumens. Available in several different colors and housing variations. This can be used as a marker or for warning lights. Also a great choice as a dome light or for compartment and tool box lighting.

SRM & SRQ

Housed in one of the smallest and lightest fixtures ever produced. This compact LED light can be mounted in virtually any location and can project almost 1,000 feet with Hybrid Spot optics or produce an unbelievable 3096 raw lumens with Specter Driving optics.

BROW MOUNTS

Rigid Industries® Brow Mount bracketry provides a straightforward solution for fire apparatus high output lighting needs. Engineered to fit up to two Rigid SR-Series light bars or one Rigid E-Series™ light bar, the Brow Mount tabs utilize a through bolt system for simple installation. Available in black or white.
